

The Little Mermaid Mobile

Materials Required:

- Thread or thin string
- Scissors
- Crayons, coloured pencils or pens
- Glue
- Sellotape

Back

Front

Instructions:

- Colour in your mermaid and her tail using some nice bright colours.
- Next fold your mermaid in half along the line marked **'fold 1'** and glue both sides together - this will make cutting out the front and back easier. Let the glue dry before cutting around your mermaid.
- Important: cut carefully around the circle at the top of her head as this is the tab you will use to hang your mermaid up.
- Using a sharp pencil push the tip through the white circle at the top of the head to make a hole for your string/thread to go through. Don't put the string through yet though.
- Now you are ready to cut out the tail - cut carefully around the outline and also the line which circles towards the middle of the tail. Then cut the dashed line in the middle of the tail for inserting the body of the mermaid.
- Now fold your mermaid at the dashed line marked **'fold 2'** and insert the body in to the slot you cut in the tail facing towards the tail. Add a piece of sellotape underneath to keep the body in place.
- Finally thread the hanger with string/thread and suspend your mermaid and watch her spin.
